

# TiVo Series 2 TCD540080 Power Supply Replacement

Replace a broken TiVo power supply.

Written By: Svyatoslav Markeyev

## TOOLS:

- [T10 Torx Screwdriver](#) (1)
-

## Step 1 — Removal of TiVo Series 2 TCD540080 Case

- Power down the TiVo and detach the power cable from the rear of the unit.
- ⚠ Wait 5 minutes for the unit to fully discharge before proceeding to the next step.

## Step 2

- Remove the five T10 screws from the rear of the case using the Torx screwdriver.

## Step 3

- Lift up and pull back the outer casing towards the rear of the unit.

## Step 4 — Power Supply

- Carefully remove the ribbon cable from the power supply. Hold the ribbon on both sides and pull up.

## Step 5

- Disconnect the hard drive power cable. Firmly grip the white power connector and pull away from the hard drive.

⚠ Do not pull on the power cables when disconnecting power connector.

## Step 6

- Rotate the device 180 degrees and remove the two T10 screws from the power supply board.

## Step 7

- Remove the four plastic standoffs.
- Use pliers to squeeze the plastic pieces on the head together. Carefully press down on the standoff and pull up on the power supply.

## Step 8

- Lift the power supply out of the unit.

 Do not touch any circuit elements or capacitors on the power supply, as they may hold a charge after the unit has been shut off.

To reassemble your device, follow these instructions in reverse order.
